Tsakiridis Devices Orpheus review

"Very good amplifier... Great sound! ...the sound is exactly what you expect from an audiophile SET- it made no mistakes. There really is no need to pay more! This is it! As dynamic as any solid-state amplifier but with the added musicality of valves.

Affordable high end! Buy it!" 9/10 ★★★★★

Six moons review: March 2010

Review Component Retail: Tsakiridis devices: £3,295/pr for the Orpheus mono blocks, £1,560 for Alexander Preamplifier

Summary results: I'd rate the Alexander a very good preamp regardless of power amplification used though it is obviously an excellent match for the stable mate Orpheus both sonically and on cosmetics. I can't help but rate the Orpheus amps very highly for their fluid musicality and their ability to make all genres of music sound natural, unforced and involving.
